LIQUID BORON 10%

Amine Borate Solution

For The Correction of Boron Deficiency in Crops

For Impregnation on Dry Fertilizer

DIRECTIONS FOR USE

FERTILIZER IMPREGNATION

May be coated onto dry fertilizer granules.

NOTE - FOR USE IN WISCONSIN: Check the TRACITE® LIQUID BORON 10% label for application to crops commonly grown in Wisconsin and requiring a medium to high level of boron.

NOTE - Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

WARNING: This product contains boron which may be injurious to certain crops.

Consult the main product label for all Precautionary Statements, First Aid, and additional Directions for Use.
