GENERAL INFORMATION

TRACITE® Z-F-M is a chelated micronutrient designed for foliar or soil application. It is recommended for use as an additive in dry or liquid fertilizers and is compatible with most of the herbicides, insecticides and agricultural chemicals that can be utilized in combination with liquid fertilizers. **TRACITE® Z-F-M** may not be compatible with some liquid fertilizer formulations. A pre-mix "jar test" is recommended prior to mixing with liquid fertilizer to check compatibility. NOTE: **TRACITE® Z-F-M** cannot be used in liquid fertilizers which contain orthophosphates. **DO NOT MIX WITH CATIONIC PESTICIDES.**

RECOMMENDED CROPS

TRACITE® Z-F-M can be applied to the following crops: Vegetables, fruits, row crops, deciduous fruit and nut trees, citrus trees and commercial turf and ornamentals.

APPLICATION AND MIXING GUIDE

Rates and timing of applications are dependent on local conditions and should always be made as a result of soil and/or plant tissue analysis and in conjunction with your local agricultural authority.

TRACITE® Z-F-M may be applied by ground or aerial application. Use enough water for thorough uniform coverage of foliage or soil. Thorough coverage is necessary for best results and the addition of a nonionic surfactant such as **INDUCE®** is recommended.

MIXING

In any mixing operation, **TRACITE® Z-F-M** should be introduced in the following sequence:

1. Water
2. **TRACITE® Z-F-M**
3. Fertilizers or Pesticides

In mixtures where a compatibility agent is necessary a product such as Helena **BLENDEx® VHC** is recommended.

Local climatic conditions, infestations and other factors affect the performance of any insecticide, fungicide, and nutritional spray. Therefore for specific use, consult your local Helena Chemical Company representative or your local agricultural extension agent.

CONDITIONS OF SALE—LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES
