### 4. First Aid Measures

- Eye** : Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.
- Skin** : Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.
- Inhalation** : Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
- Ingestion** : Call a poison control center or doctor immediately for treatment advice. Rinse mouth with water. Do not induce vomiting. Do not give anything by mouth if unconscious.
- Indication of Immediate Medical Attention and Special Treatment Needed** : Treat symptoms. Contains aromatic hydrocarbon and can be extremely harmful if swallowed and enters airways. Stomach lavage with a cuffed endotracheal tube in place and immediate administration of activated charcoal should be considered.

### 5. Fire Fighting Measures

- Extinguishing Media** : Use foam, dry chemical, carbon dioxide or water spray.
- Specific Hazards Arising from the Chemical** : Incomplete combustion may produce carbon monoxide. May produce fluorine compounds or oxides of nitrogen.
- Special Fire Fight Proc** : Wear self-contained breathing apparatus and full protective clothing.

### 6. Accidental Release Measures

- Personal Precautions** : Isolate spill area. Keep unprotected and unnecessary personnel out of spill area.
- Protective Equipment** : Splashproof goggles or face shield, impervious gloves, impervious apron and footwear. Use a respirator approved for pesticides if in enclosed areas where exposure limits may be exceeded. Eyewash and emergency shower should be available in work area.
- Emergency Procedures** : Minimize use of water when cleaning up spills to prevent environmental contamination.
- Methods and Materials for Containment and Cleanup** : For small spills, absorb onto sand, vermiculite or other inert absorbent. Collect and place in suitable container for disposal. For large spills, dike using absorbent material, such as clay or sand. Recover and contain as much free liquid as possible for reuse. Allow absorbed material to solidify, then collect for disposal. After removal, clean contaminated area thoroughly with water. Pickup wash water with additional absorbent and place in suitable containers for disposal.

### 7. Handling and Storage

- Precautions for Safe Handling** : Use only in a well-ventilated area. Do not reuse containers unless designated as refillable and only refill with same product.
