PRECAUTIONARY STATEMENTS

General:

If medical advice is needed, have product container or label at hand.
Keep out of reach of children.
Read label before use.

COMMENTS: TOXICITY END POINTS FOR THIS PRODUCT EXCEED GHS CLASSIFICATION.

PRODUCT INFORMATION

VIRIDIS is a highly active ortho-ortho iron EDDHA chelate micronutrient designed to correct iron deficiencies in crops and will aid in iron chlorosis when used as recommended.

The iron in *VIRIDIS* is chelated using 100% ortho-ortho EDDHA. This makes *VIRIDIS* effective in soils with a high pH because it can keep the iron in solution under alkaline conditions.

VIRIDIS is designed for use as a foliar spray or soil applied fertilizer, and may be applied by fertigation, agricultural spray equipment or soil injection.

VIRIDIS is a dark red, water soluble granular that may discolor objects it comes into contact with. Avoid unnecessary contact and/or wash discolored objects thoroughly with water.

DIRECTIONS FOR USE

Apply by spray or soil injection at recommended rates to intended crop.
VIRIDIS can be applied alone, or mixed with other nutrients, pesticides or additives.

MIXING INSTRUCTIONS

*Always perform a compatibility (jar) test with all tank mix ingredients.

1. Partially fill tank with water and start agitation and maintain good agitation throughout the tank mix.
2. Add *VIRIDIS* to circulating tank mix, increase agitation if needed to help *VIRIDIS* go into solution.
3. Add other compatible nutrients, pesticides or additives. Pesticide(s) should be added in order recommended on the pesticide label.
4. Addition of a highly effective water conditioner at maximum rates is recommended.
5. Fill remainder of tank with water and agitate.

NOTE: Mixing with glyphosate reduces the effectivity of glyphosate. Do not mix *VIRIDIS* with glyphosate when foliar applied to any crop.

APPLICATION RATE RECOMMENDATIONS

Crop	Foliar Spray	Soil Injection
Vegetables	Ground: 1-2 lb/acre in 10 to 20 gallons water Air: 0.5 - 1 lb / acre in 5 to 10 gallons water	2.5 - 5 lb/acre
Field Crops	Ground: 1-2 lb/acre in 10 to 20 gallons water Air: 0.5 - 1 lb / acre in 5 to 10 gallons water	2.5 - 5 lb/acre
Fruit / Nuts / Citrus	Ground spray 1 lb in 100 gal per acre after harvest until bloom. Do NOT apply with spray oils or miticides.	½ - 1 oz per tree per inch of trunk diameter. Do not exceed 1 lb per tree
Soybeans	Ground: 1 lb/acre in 10 gallons of water Air: 0.5 - 1 lb / acre in 5 to 10 gallons water Spray prior to or immediately after signs of deficiency are detected. Repeat up to 2 applications on 7-14 day intervals as needed. In-furrow use 1-2 lb. per acre mixed with water.	1-2 lb/acre
Sugarbeets		1-2 lb/acre
Dry Beans	1 lb/acre in 10 gallons water prior to or immediately after signs of deficiency are detected. Repeat up to 2 applications on 7-14 day intervals as needed.	1-2 lb/acre
Sorghum	1 lb/acre in 10 gallons water prior to or immediately after signs of deficiency are detected. Repeat up to 2 applications on 7-14 day intervals as needed.	1-2 lb/acre

For most applications, it is recommended to use a ratio of 1 lb *VIRIDIS* to 2 gallons water.

STORAGE: Store in cool, dry place at temperatures between 40-95 °F.
