F-11 PHOTO & THE PRINT REFINERY™ GENERAL INFORMATION

OUR GUARANTEE OF QUALITY:

Here at F-11 Photo & The Print Refinery™, we take great pride in our work and appreciate you entrusting your images to us for processing. With every order you place, our commitment is to produce the highest quality products. If you are not completely satisfied, we will gladly remake your order to your satisfaction. We want to be your first choice for quality and service.

MAIL SERVICES:

Want to use our processing services but live outside the Bozeman area? We can still be your lab of choice. Just give us a call at 800-548-0203 or 406-586-3281 and we will send you pre-addressed Tyvek mailers. There will be a minimum return shipping charge of \$8.95 for your order. You may include payment in the form of a check or credit card number or we can call you for a credit card number when your order is ready. To mail an order without our mailer, please use the following address:

2612 West Main Street, Bozeman, MT 59718

RUSH SERVICES AND CHARGES:

Need a job done ASAP? We may be able to provide a quicker turn around time. Approval is required on all rush orders, so please call us to verify rush availability at 406-586-3281 or toll free at 800-548-0203. Rush charges add 50% to 200% to our normal rates, depending on how fast you need the work done.

OVERTIME SERVICES:

Work scheduled for processing before or after our normal operating hours must be arranged two weeks in advance. For "after hours" runs on normal work days, the fee is \$50.00 per hour plus normal processing charges. Sunday runs are a \$300.00 flat fee plus normal processing charges; holiday runs are a \$400.00 flat fee plus normal processing charges.

LIMIT OF LIABILITY:

Submitting any film, print, slide, negative or electronic media to F-11 Photo and the Print Refinery™ for processing, printing or other handling constitutes an agreement by you that any damages or loss by our company, subsidiary, or agents, even though due to the negligence or other fault of our company, subsidiary or agents, will only entitle you to replacement with a like amount of unexposed film and processing or electronic media. Except for such replacement, the acceptance of the film, print, slide, negative or electronic media is without other warranty or liability, and recovery for any incidental or consequential damages is excluded. F-11 Photo and the Print Refinery™ does not assume liability, whether lost or damaged by fire, theft, negligence or any other means, for customer supplied materials, such as frames, paintings, artwork, etc., that are submitted with orders. Should you choose to leave materials or prints, not processed in our lab, we cannot assume responsibility for any damage incurred. We cannot be responsible for materials left unclaimed for more than 30 days after completion of our service. All prices and service specifications are subject to change without notice.

COPYRIGHT LAWS:

At F-11 Photo and the Print Refinery™ we respect the right of all artists and photographers to their copyrighted materials. We accept copyrighted materials only if written permission has been granted by the copyright owner and a signed copy of the copyright release is provided. In addition, you need to agree to hold harmless and indemnify F-11 Photo and the Print Refinery™ for any costs or judgments resulting from claim for copyright infringement by the owner or his lawful assigns.

Per Sq. Ft.	\$18.00	\$ 22.50	\$ 27.00

Please call for a quote if your print is larger than a 30x40.

For a rough estimate you can calculate by the square foot: e.x. 16"x20" = 320",
 $320"/144 = 2.22'$, $2.22' \times \$18 = \39.99 ;

This will calculate the price for our Premium Papers. For Specialty Papers, substitute the \$18 for \$22.50 or \$27.00.

Description of materials used:

Cardboard:	Durable and inexpensive; use in a frame behind glass.
Foam-Core:	Sturdy, non-wrinkling and lightweight; use with or without a frame, edges are unfinished. Trimable to any size; 3/16" thick.
Gallery Mount:	Stand-off design, either .75" or 1.5" thick. The mount is a lightweight, dense, Gatorfoam with a professional black edge and is ready to hang.
Cold Lamination:	A 5 mil. cold overlaminated in glossy, lustre or leather protective film.
Hot Lamination:	A 5 mil. heat sealed, glossy lamination applied to both sides of the print, to block damaging UV rays and protect it against fingerprints, dirt, and moisture.

GALLERY CANVAS WRAP

GALLERY WRAPS

No need to frame your canvas print if you choose a stunning gallery wrap. Your image is printed on premium canvas and sealed to prevent cracking. Your canvas is then secured around a wooden frame and comes with easy to hang brackets on the top corners.

LAYERED METAL ART:

Mix and match the Chromaluxe metal photo panels to create your unique work of art. Add patinaed sheet metal or rusted grid metal as a background for a more rustic look.

Choose the style of hanger that works best for you, or choose no hanger at all so you can frame your metal art.

To calculate layered metal price, add the prices of the metal pieces together and add \$15 for magnets or \$30 for bolted assembly for each foreground piece (do not add assembly to the background piece). Choose your hanger and add that to the total for your completed cost.

BAMBOO BLOCKS:

Bamboo blocks are an easy, elegant, eco-friendly way to exhibit artwork and photos without the clunky and expensive frames, glass and mat. With photo mounted bamboo we print your image and then mount it to the bamboo. The ink on wood option actually has the image printed directly onto the surface of the bamboo giving it a slight texture.

MOVIE FILM TRANSFERS

Our state-of-the-art equipment scans each individual frame from movie film resulting in the highest quality output from old movie film ever available.

Before film is transferred, it is cleaned and lubricated, bad splices are replaced and damaged film is repaired. Small 50' reels will be spliced together and returned on 400' reels unless requested otherwise which will incur a small fee. Any blank film, 5 seconds or more, will be removed. Images that are out of focus, upside down, over or under exposed, will be left in. Note: sometimes film is received damaged beyond repair. In these cases we will try to run the film as best as possible.

Once the film is scanned it can be transferred to a hi-definition BluRay disc, a standard definition DVD, or the files can be put onto a hard drive. There is also an option to have a JPG file of each individual frame from the film (these files are quite large so a hard drive must be supplied).

A single two hour DVD or BluRay disc can hold up to 1600' of Regular 8 film, 1800' of Super 8 film or 3600' of 16mm film.

Titles are added at no extra charge and can be placed at the start of any reel, however, there is a limit of one free title for each 200' of movie film.

PHOTOGRAPH RESTORATION

Ready in an average of 10 days.

Photo Restoration Services combine the latest digital technologies with artistic skill to restore faded, worn, stained, spotted, torn, cracked, bleached, and otherwise damaged photographs. Photo restorations can also add or remove backgrounds, reconstruct missing image areas, remove unwanted people or colorize a black & white photo. No harm or changes will come to your original as we start by scanning it. The adjustments you choose will be made on the digital image. Damaged photographs can look as good as new, or even better! Prices below are for the actual restoration only, delivered on CD. See "Copy Scan" in "Scanning" and "Prints and Enlargements" or "Archival Inkjet Printing" for additional scanning and printing charges.

TRUE BLACK & WHITE PRINTS:

This is not inkjet, not color paper, not cool black & white, not warm, not sepia tone and not "close" to black & white; this is real black & white printing. Prints are made on a Fuji Frontier Silver Edition, professionally converted to the black and white process. By combining the proven laser print quality of the Frontier with Ilford's world renowned black and white paper technology, the results are no less than spectacular.

COLOR CORRECTIONS:

We can make overall color and density adjustments to most images; however, we face two conflicting demands in deciding whether or not to do so. If you are a digital camera user seeking an easy way to get good color prints, you will probably want us to employ our expertise in optimizing your images. On the other hand, if you have put a lot of effort into perfecting an image in Photoshop, you would not want us tweaking it behind the scenes. You are encouraged to instruct us to make adjustments or not. In the absence of instructions, our decision to adjust will be based upon the following logic: If the files appear to be unedited images from a digital camera with camera-generated names, we will adjust color and density as we see fit. If the files appear to be edited in any way, we will print them as-is. Please remember, when editing your digital images, good hardware-based monitor calibration is necessary. We strongly recommend calibrating your monitor regularly. If you are working on an un-calibrated monitor, for best results do not edit the color of your images. If you already have prints from a negative or digital source and you like the color, please provide the print for us to use as a color guide. We will do our best to match it. Our Kiosk color converts the file to an output that our printer reads.
